📍 Beijing

EDUCATION

International economy and trade

North College of Beijing
University of Chemical
Technology

📅 2011 - 2015

📍 Hebei province

Awards

- CET 4

SKILLS

- JavaScript(ES6)
- TypeScript
- HTML/ CSS
- React/Redux
- Next
- Vue/Vuex
- Nuxt
- Webpack
- Node.js
- Socket.IO
- WebRTC
- MongoDB
- PWA
- Firebase
- Responsive UI
- Tailwind CSS
- Jest
- CI/CD

SELF INTRODUCTION

For the past 6 years, I have kept programming for the front-end all the time. From Internal Backend Management System to external webpage for users. From mobile to desktop.

In my spare time, I like to watch some YouTube videos and technical Docs, I think this is a good way both study something new skills and English at the same time. I have used React JS for about 4 years, and I have built lots of SPA applications. Recently, I'm interested in Next JS, cause of the Server-Rending functions. It is very friendly for SEO.

And I am also interested in TailwindCss these days. The built-in semantic className makes writing CSS became much faster and much easier to build a responsive design webpage.

I have also learned some server-side languages such as Node JS. I like to use Node JS to build a server by testing some new technologies that I'm interested like WebSocket and WebRTC. I'm trying to use them to build a simple video chat room.
